

Deployment Package

Golf-Matcher

SWENG 894

December 9, 2019

Dan Castellucci

William Ganley

Peter Jester

Craig Roland

Q/A Test Environment

- We conducted our quality assurance testing in our own local environments.
- We hosted our baseline on github.
 - After a push to master, our automated deployment pipeline kicked off using travis-ci (travis-ci.org)
 - Our pipeline conducted E2E and Unit Tests

Production Environment

- We used Firebase Hosting for our production environment.
- Our deployment instructions exist on our README, and are shown below
 - `ng build --prod`
 - `firebase deploy`
- Our golf-matcher application can be reached:
 - <https://golf-matcher-cf449.firebaseio.com/>
- All of our deployment package all of our components via the angular lifecycle “build”, listed below:
 - Util
 - Team-add
 - Team-edit
 - Sidebar
 - Authentication
 - Teams
 - Schedule
 - Player-add
 - Handicaps
 - Players
 - Leaderboard
 - Players-edit
 - Scores-edit
